

Movico Technologies Presents India's First Video Management Software

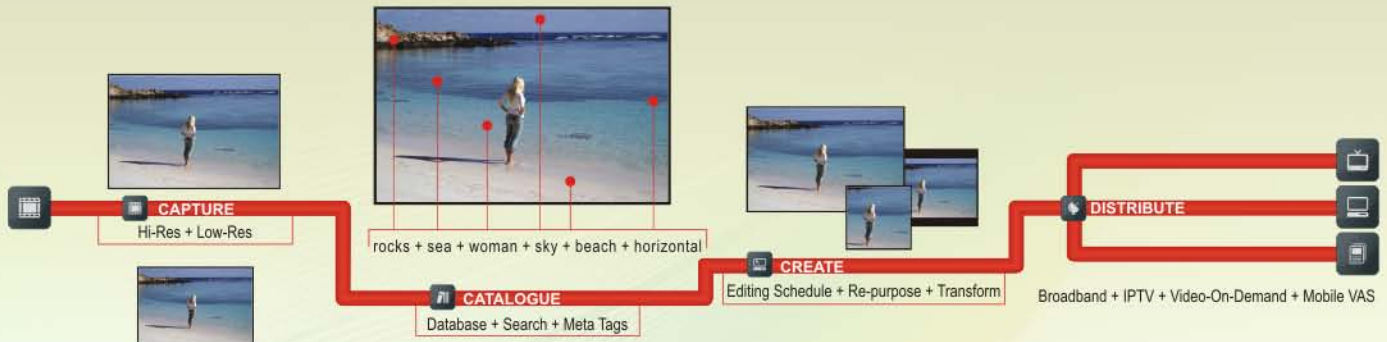

MediaBaron
Unlock Your Tape Library

The first digital workflow software for producers built over streaming technologies

- ▶ Single pass high-res and low-res capture
- ▶ WAN support for online meta-tagging, logging and clip generation
- ▶ Tapeless production workflow via drag-n-drop interface
- ▶ Integrated Transcode, FTP and PlayOut Servers for monetization over web & mobile

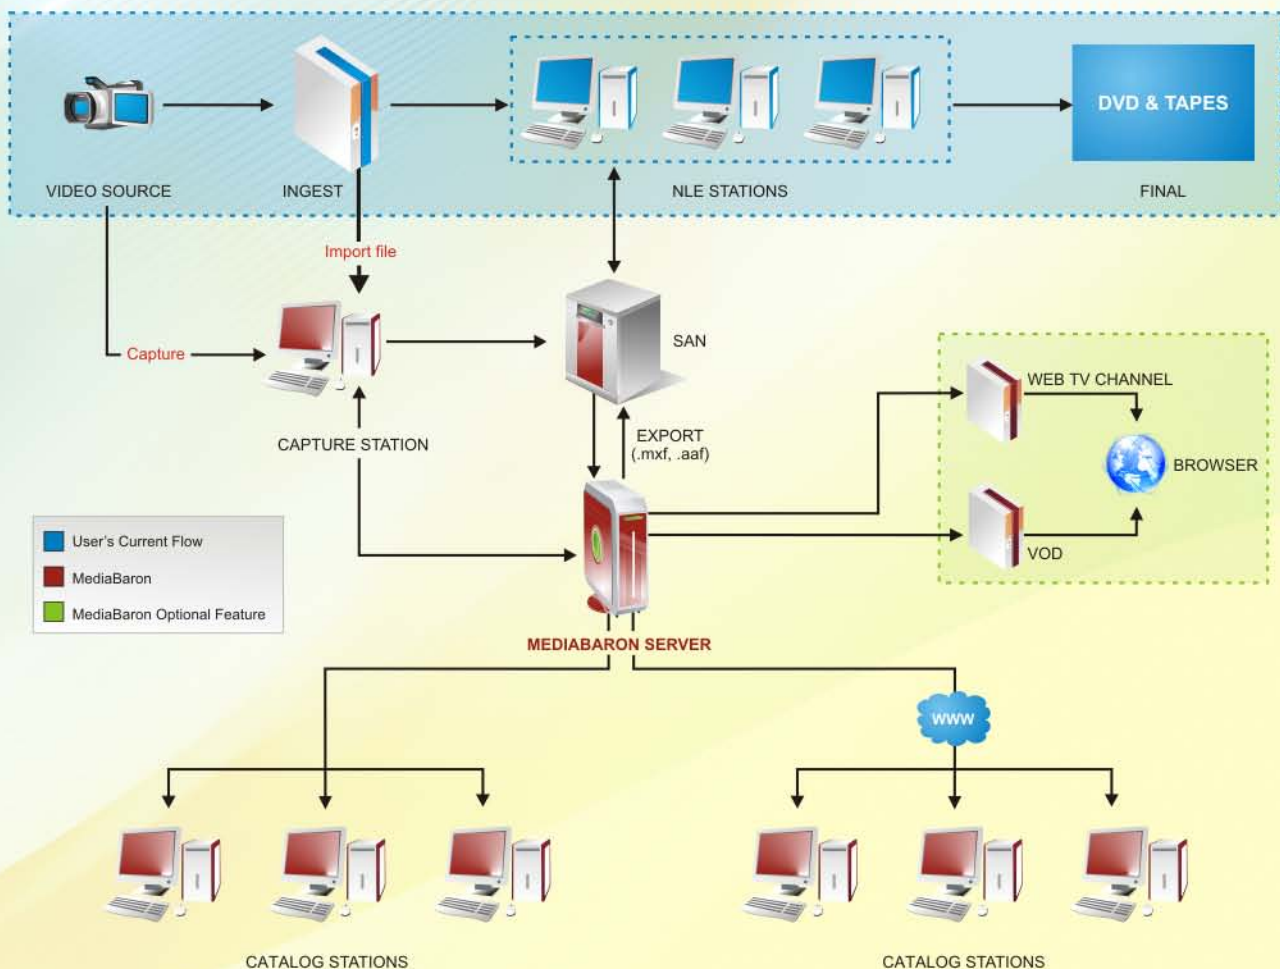

MediaBaron is a software platform intuitively designed to integrate all the elements of production, giving you single-point control over the entire process.

Media Baron can be deployed in an eLibrary scenario to support a tape-less Production and Workflow management process; or as a newsroom archival support tool providing access to historical references quickly; or as a back-end to a video web portal facilitating video download via ecommerce; or as an workflow tool for higher productivity and cost savings in a video handling environment.

MediaBaron - Workflow

e- Library Solution for Video Producers
